

TotalDeploy™

FarStone's TotalDeploy™ is a comprehensive deployment solution that enables organizations (businesses, schools, federal/state/local governments, etc.) to deploy new servers quickly and easily. Instead of installing the standard configuration (operating systems, applications, and programs) to multiple computers one by one, TotalDeploy™ saves time by taking a disk image and deploying that image to multiple computers, simultaneously. TotalDeploy™ works to deploy operating systems with hardware-independent imaging, software distribution, and user settings and profiles.

System Architecture:

- ✓ Complete system or customizable deployment to workstations or servers
- ✓ Deploy to different hardware with Universal Restore/Dissimilar Restore
- ✓ Advanced script function
- ✓ Windows PE support
- ✓ PXE support
- ✓ Windows 7 compatible

Features & Benefits:

- **Free Backup Agent**
After burning the Backup Agent to a CD/DVD, you can back up your source computer to an image.
- **Customizable Deployment**
New machines are properly deployed by providing options to specialize the computer names, IP addresses, etc.
- **Centralized Management Console**
Management Console provides centralized management of deployments across the network.
- **Advanced script function**
Execute pre-defined commands (scripts) after deployment.
- **Deploy to different hardware with Universal Restore/Dissimilar Restore**
Deploy to original or different computer, or even to a virtual machine, without any hassle.
- **Multicasting**
Provides image multicasting to minimize bandwidth usage and speed the deployment of new images.
- **64-Bit Windows Support**
Supports 64-Bit Windows
- **Log view**
Consolidate all activities for all clients into a centralized log view
- **PXE Support**
Fully supported PXE network environment allows any client to be booted up from the PXE server.
- **Windows PE support**
WinPE environment provides 100% hardware support. For example, RAID 0/1/5/10/JBOD, software RAID and network are fully supported in pre-OS.
- **Fully compatible with other FarStone products**
TotalDeploy™ has the capability to deploy images created with FarStone's Total Backup Recovery® Suite or TotalRecovery™.
- **Free Technical Support**

System Requirements:

TotalDeploy™ Console:

- ✓ Windows XP, Vista, 7
- ✓ Windows 2003, 2008, 2008 R2

TotalDeploy™ Backup Agent:

- ✓ Windows XP, Vista, 7
- ✓ Windows 2003, 2008, 2008 R2
- ✓ 512MB RAM
- ✓ CD/DVD Burner

TotalDeploy™ Bootable Agent:

- ✓ Windows XP, Vista, 7
- ✓ Windows 2003, 2008, 2008 R2
- ✓ 512MB RAM
- ✓ Network adapter with PXE boot support
- ✓ CD/DVD Burner
