- Supports RAID 0/1/5/10/JBOD
- One Touch Recovery
- Complete System Backup for Windows 7
- Supports Windows XP/Vista/Win 7, and Linux

FarStone®
Total Backup Recovery™

Green Backup Software - Backup entire PC with no installation required

Product Overview:

FarStone **Total**Recovery™ Express is a "Green Application" that provides complete PC protection without running installation on your computer. It backs up your entire Windows or Linux based PC including data, applications, music, photos, settings and OS. FarStone **Total**Recovery™ Express can also copy (clone) an exact duplicate image of the hard drive on servers or workstations, including personal files/folders, OS, databases, drivers and all other data on the hard drive. The image can be used for data restoration, disaster recovery, or restoring your computer to similar or dissimilar hardware. The Data Shredding feature included in FarStone TotalRecovery™ Express protects sensitive data by completely wiping out a disk or partition.

Destination can be a HDD, USB storage, SSD, NAS, or any other storage device, including iSCSI.

Supported Operating Systems

- Windows 7 Series
- Windows Vista Series
- Windows 2008 Series
- Windows XP Series
- Windows 2003 Series
- Windows 2000 Series
- Linux
- Unix

Compatible with
Windows 7

Supported File Systems

- FAT16/32, NTFS, Linux Ext2/Ext3, ReiserFS, Linux Swap and other unknown partitions.

Hardware Requirements

- CPU: Pentium-class processor or higher
- RAM: 512 MB
- Disk space: No installation required

Features:

Complete Backup
Make a complete copy of your hard drive, including system settings, partition information, documents, photos and more; save it as a compressed image file. If you suffer a system or disk crash, virus attack or other failure, you can restore the entire system disk in minutes.

Clone Drives
Make a complete copy of your hard drive including system settings and partition information.

Data Shredding - US DoD 5220.22-M Standard Complied
Complies with the US Department of Defense (DoD) 5220.22-M clearing standard. Securely wipe out your hard drive contents from outside of Windows.

RAID Support
Supports most 0/1/5/10 hardware and software RAIDs.

Win-PE engine
100% compatible with existing hardware and future hardware.

Powerful Universal Restore
Restore files or images across different hard drives regardless of hard drive format, size, brand, or operating system; or clone your computer to a new hard drive.

Pre-Windows Recovery
DriveClone Express works even when your operating system doesn't, allowing you to restore your system regardless of OS functionality.

Image Integrity Verification
Automatically ensures that backup images work properly.

Complete External Backup
Enables you to store your hard disk image on a USB hard drive.

CD/DVD Support
Use the built-in burner to save a copy of your hard drive on a CD or DVD.

Bare Metal Restore
Copy a complete system image onto a brand new hard drive without needing to install an operating system first.

Partition Support
TotalRecovery™ Express supports FAT32, NTFS, Linux EXT2/3 and other unknown partitions.
