FARSTONE®
Total Backup Recovery™

VirtualDrive® Pro 14

The VCD Manager lets you organize your virtual discs in cabinets for easy retrieval and play.

VirtualDrive® Pro 14 CD/DVD/BD emulator converts CDs/DVDs/BDs into compressed images, or virtual CDs (VCDs), which can play in any one of up to 23 VCD drives. With VirtualDrive® Pro 14, you'll find a fast responsive result, quiet CD/DVD/BD playback, NO wear and tear on the drive, and complete freedom from physical discs. Keep your discs safe from loss or damage. The built-in virtual hard drive allows you to run games and applications up to 340 times faster in RAM!

Load several virtual drives simultaneously and switch from one virtual CD (VCD) game or application to another without having to handle physical CDs or wait for a disc to spin up. Archive your VCDs in a searchable library and easily store them on a digital device.

FEATURES & BENEFITS

- **Blu-ray support:** VirtualDrive® enables you to easily read, burn, record, and clone unprotected Blu-ray discs.

- **Custom Cover:** Users can create a custom cover for every Virtual CD.

- **Innovative display mode:** Cover flow helps to select, operate, edit, and delete CDs/DVDs/BDs.

- **Wizard procedure:** Create and burn CDs/DVDs/BDs with a few easy clicks.

- **Touch screen support:** Easier touch operations that present clear and cool icons.

- **Portability and Convenience:** Save your VCDs to your laptop's hard drive, a network share, USB device, or any digital storage device. Launch them by clicking on custom desktop shortcuts.

- **Optimal Performance:** VCDs run directly on the hard drive, eliminating CD/DVD-ROM read and write times and spin-up delay.

- **ISO Support:** Import an ISO file into the VCD Manager and play it directly without having to convert it to another format.

- **Multiple Disc Play:** Run up to 23 programs simultaneously in your virtual drives. There is no need to swap out physical discs.

SYSTEM REQUIREMENTS

The following system specifications are required for running VirtualDrive v14:
Operating System:

- Windows 7 (any version) with the latest service pack and at least 512 RAM
- Windows Vista (any version) with the latest service pack and at least 512 MB RAM
- Windows XP (any version) with the latest service pack and at least 256 MB
- Windows 2008 (any version) with the latest service pack and at least 512 MB
- Windows 2003 (any version) with the latest service pack and at least 256 MB
